

Carla Carvalho | The Executive MBA

ON CONTINUOUS PATH TO IMPROVEMENT

Carla is passionate about blending technical and experimental knowledge with theoretical studies, unfolded by capable, innovative, and original solutions.

Her professional career reflects a versatile attitude. Carla went through several engineering fields, took on different roles, and founded some companies and departments. With a degree in Geological Engineering and a Master's in Soil Mechanics and Geotechnical Engineering, Carla has a resilient and entrepreneurial spirit with exceptional leadership skills that promote the best of each team member.

With a strong analytical mindset, Carla believes knowledge is not static. Therefore she is always in constant movement and often suspends her professional activity, sometimes radically, to acquire and update knowledge.

With this MBA, she hopes that learning trailblazing subjects will contribute to her professional activity: conception and implementation of a tourism, rural and technological tourism enterprise.
